

WEATHER PROOFING KITS

Standard Weather Proofing Kits

Exclusive Weather Proofing Kits

PRODUCT DETAILS

Weather proofing kits are used to safeguard transmission line systems against harsh environmental conditions.

These kits combine self-amalgamating tape and PVC tape to provide a tight, durable seal around cables and connectors, ensuring long-term reliability and protection.

TECHNICAL DETAILS

PARAMETER	DETAILS
Sealing Material	• Butyl / Self-Amalgamating Tape
Outer Protection	PVC Tape
Tape Width	19 mm / 50 mm
Tape Length	Up to 10 m
Application	Cable & Connector Sealing
Protection	Moisture / Dust / Weatherproof
Usage	Outdoor Telecom Installations

VARIANT -1 (Standard Weather Proofing Kit)

- Contains Butyl Tape (50 mm x 1000 mm)
- Includes PVC Tape (50 mm x 10 m)
- Number of butyl layers customizable as per requirement

VARIANT -2 (Exclusive Weather Proofing Kit)

- Contains Self-Amalgamating Tape (19 mm x 10 m)
- Includes PVC Tape
- Designed for enhanced sealing and premium performance
